BIOSOL Na8**CEMENT REMOVER & ETCHER****TECHNICAL DATA**

From landscaping to building construction, roadways to the oil patch, the use of cement is extensive and the challenges of removing it safely are just as varied as its many purposes. Now, with minimal effort and time, remove old or excess cement with *BioSol Na8 Cement Remover*. Environmentally-friendly and easy-to-use, *BioSol Na8 Cement Remover* achieves optimal results without the use of harmful containments. Whether it is aluminum, steel, plastic, or painted surfaces, *BioSol N/A8 Cement Remover* dissolves cement without harming the original surface. *BioSol Na8 Cement Remover* presents no risk to the user and has easy equipment clean-up.

With the growing demands of being environmentally responsible, we are continually researching and developing new products that are safe for the environment and user. Without compromising quality or performance, *BioSol Na8 Cement Remover* is such a product. Safely removing cement from equipment by solidifying containments, *BioSol Na8 Cement Remover* contains no carcinogens or phosphates and is 100% biodegradable. A non-flammable, non-fuming, and non-explosive cleaning product, *BioSol Na8 Cement Remover* does not require any unique safety equipment for applications when used under normal conditions. After cleaning application is complete, the PH level of the cement will be neutral allowing for safe handling.
