

ANTI-FOAMERS/DEFOAMERS**TO MUCH FOAM IN YOUR SYSTEM?**

Any water-based formulation or aqueous process that contains some type of surfactant (dispersant, detergent, latex, starch, wetting agent, etc) and is subject to air entrainment (agitation, cascading, pumping, rolling, brushing, spraying, etc.) will usually exhibit some degree of unwanted foam

FOAMBREAK 500S		Active anti-foam for rapid dissipation of foam. NOTE: For more information see Technical Data Sheet
PART NO.	SIZE	
ACL-FB500S-20	20 LITRE PAIL	
ACL-FB500S-205	205 LITRE DRUM	
FOAMBREAK 1000S		Active Concentrated anti-foam for rapid dissipation of foam. NOTE: For more information see Technical Data Sheet
PART NO.	SIZE	
ACL-FB1000S-20	20 LITRE PAIL	
ACL-FB1000S-205	205 LITRE DRUM	
FOAMBREAK 150WS		Active anti-foam for rapid dissipation of foam. NOTE: For more information see Technical Data Sheet
PART NO.	SIZE	
ACL-FB150WS-20	20 LITRE PAIL	
ACL-FB150WS-205	205 LITRE DRUM	
FOAMBREAK 200WS		Active Concentrated anti-foam for rapid dissipation of foam. NOTE: For more information see Technical Data Sheet
PART NO.	SIZE	
ACL-FB200WS-20	20 LITRE PAIL	
ACL-FB200WS-205	205 LITRE DRUM
