

### FOAMER/SAND, SILT & SLUDGE DISPERSANT

#### SAND, SILT OR SLUDGE PLUGGING YOUR GAS FLOW?

In some cases a buildup of sand, silt or sludge solidifies downhole or in flowlines slowly constricting the flow of gas. The solution exists in braking apart these plugs to allow the gas to flow unrestricted.

<b>REACTION 100W</b>		Flowline "SLUDGE & SILT" dispersant c/w FOAMER Designed to convert dense sludge and silt deposits into light non adherent agglomerates that permit easy dispersion. Foaming agents aid in the unloading of natural gas wells where water buildup reduces production. Winterized <b>NOTE: For more information see Technical Data Sheet</b>
