

H2S SCAVENGERS

NAME/PART NO.	SIZE	DESCRIPTION & USE
H2S SCAVENGER STICK White (Water Soluble Tube) (Bag) ACL-0050	1 1/4 X 15	This Stick is used to scavenge through the water phase in the produced water. Organic sulfide scavenger rapidly complexes with H2S to produce a water soluble & dispersible by product that helps minimize solid deposition in system equipment. Some water needs to be present for the sticks to dissolve and to effectively scavenge the hydrogen sulfide.
