

PARAFFIN DISPERSANTS**PARAFFIN PROBLEMS?**

Paraffin problems can significantly affect well/lease profitability, causing troublesome operational issues, damaging formations and decreasing production. Understanding the nature of paraffin's, the conditions that lead to their becoming problems and solutions for controlling them are important.

PARATEK 100		An excellent quality asphaltene dispersant. This product keeps asphaltenes solublized (in suspension) and dispersed to avoid reflocculation (rejoining of particles) and reduce the size of particles. Formulated to allow increased contact between solvents and deposits even in the presence of water. NOTE: For more information see Technical Data Sheet
<u>PART NO.</u>	<u>SIZE</u>	
ACL-PAR100-20	20 LITRE PAIL	
ACL-PAR100-205	205 LITRE DRUM	
ACL-PAR100-1025	1025 LITRE TOTE	

PARATEK 200		Highly concentrated asphaltene dispersant. This product keeps asphaltenes solublized (suspended) and dispersed to avoid reflocculation (rejoining) & reduce the size of particles. This formula allows increased contact between solvents & deposits even in the presence of water. **CONTAINS NO XYLENE** NOTE: For more information see Technical Data Sheet
