

**DOWNHOLE CARBONATE SCALE, RUST, LIME- WATER INJECTION WELL PRODUCTS**

NAME/PART NO.	SIZE	DESCRIPTION & USE
<b>ACID PELLETS</b> Off White (Pails)  ) ACL-ACD	PELLETS	Water-Soluble pellets release acid down-hole in water injection and producing gas wells to remove carbonate scale and rust deposits. These pellets are a combination of acid, surfactant, dispersing agent, iron sequestrator, and inhibitor in solid form.
<b>CORROSION INH. PELLETS</b> Off White (Pails)  ) ACL-CIP	PELLETS	Water soluble designed to release corrosion inhibitor. Surface active aids in solids removal & control, while helping eliminate breeding grounds for microorganisms. Contains Ammonium Quaternary Salt. Used in water injection systems, gas wells, cooling towers etc. Specific gravity of 1.15 to 1.25. Will fall in brine solutions. Treatment of 30 PPM of 4200 U.S. gal. of water require 1.05 lbs
<b>PARAFFIN INHIBITOR PELLETS</b> Brown (Pail)  ) ACL-PIP	PELLETS	Oil-soluble pellets release paraffin inhibitor to reduce paraffin deposition from crude oil in production systems. Stick contains a combination of micro-crystalline wax & special crystal modifiers. The ingredients contribute to an effective inhibiting process on certain ranges of molecular weight paraffin's.
<b>SCALE INHIBITOR PELLETS</b> (Pails)  ) ACL-SIP	Pellets	Scale Inhibitor Pellets contain chemicals that help prevent carbonate types of scale from depositing downhole in oil and gas wells, casing, tubing, and flow lines. It is also very useful to include Acid Pellets in this type of treatment since Acid Pellets will remove carbonate types of scale after being deposited, also neutralizing scale in solution.
